High Availability Configurations
Add additional servers	$4995/£3210/€3750

*In configurations involving Collections/Portfolios, a Collection/Portfolio is considered a workspace.

UPGRADES, SUPPORT AND MAINTENANCE (mandatory the first year)

Applicable to both Workgroup and Enterprise versions: 15% of the RRP.

The Support and Maintenance package includes software assurance. For example, customers with existing Support and Maintenance contracts can upgrade to major new releases of the software at 30% of the RRP, plus an additional Support and Maintenance cost that is 15% of the upgrade RRP. Customers without the Support and Maintenance will have to pay the full RRP of any major upgrades.

E.G SuperComputers Ltd buy FocalPoint Server software for 1 server, 5 workspaces and 5 users and would like to add a second server in a High Availability configuration. The same 5 workspaces are usable by connecting to either server. However the total number of users who can connect to either server at any given time remains 5. For example, if there are 3 users connected to one server, only 2 users can connect to the other server.

Please note that the licensing charges apply only to the servers running FocalPoint Server software. The FocalPoint Server database can be kept in separate servers for best performance and scalability, but licensing charges do not apply to such servers..
